

Glance

Natuurlijke henna voor wenkbrauwen

INSTRUCTIONS

1 Open the henna jar and mix per scoop (included in the box) powder 7 drops of the FIXATOR + if needed 2 drops of mineral water - use the Glance Way pipette. Mixing different colors will give a more personal result per client

2 use the crystal mixing pot

3 Mix well to a creamy consistency. If the mixture is too thick, add a an additional drop of water

4 Apply the product using a cut brush or cuticle stick

5 Remove all spots and failed edges and leave the mixture to act for 7 minutes. Beware, the mixture should not get dry - in that case, too little product was used

6 Remove with a dry cotton pad

7 Softly add some fixator to the end result with a cotton swab and avoid water for min. 4 hours

RECOMMENDATIONS

The duration of the result of GLANCE henna depends entirely on how well the henna mixture acted on the skin before it was removed.

In the case of an oily skin it is strongly recommended to clean and free the skin of any greases or oil. Using The oil free GLANCE exfoliante (scrub) and a sabonete (soap) before treatment will therefor be your answer. We advise to always use both. This prepares the skin and removes impurities and ensures that the hair follicles of the eyebrows are opened

Using the eyebrow templates is optional. The 6 different forms can help to facilitate the design of the eyebrows. Simply put the template on the desired location, pull it tight to the skin with thumb and finger and then fill in the template with the created mixture.

Use the eyebrow ruler In case of asymmetric eyebrows. This way you can measure height, length and distances with precision in relation to both eyes.

GLANCE eyebrow henna can be mixed with water, milk or FIXATOR. However, the FIXATOR stimulates a more intense and shorter acting process.

The remover can be used in case of spots or an unwanted result. It can also be used if creating an ombre brow. Simply apply some remover on your swab and gently stroke the start of the brow in an upward direction. After you reached the perfect result do apply a final thin layer of fixator

If you want to (re)model the eyebrows when dealing with henna, please use the following steps

- 1 Make up remover
- 2 soap
- 3 scrub
- 4 face mapping
- 5 epilation or waxing
- 6 apply henna
- 7 remove henna
- 8 final layer of fixator

For a maximum result, all hygiene guidelines should be taken into consideration.

GLANCE henna is a professional salon product. This product may therefore not be sold to non professionals

IMPORTANT TO READ BEFORE USE

GLANCE Rare Way henna is a product that is based on natural extracts, free of heavy metals and ammonia. The risk of an allergy is small but not impossible. To prevent an allergic reaction from occurring, please observe the following precautions:

Do not use in case of;

- 1 known allergic reaction to henna
- 2 wounds or inflammation in the eyebrow
- 3 on existing Tattoos
- 4 Remember: This product may only be used on the eyebrows
- 5 Keep the eyes protected during the application with a cotton pad
- 6 Avoid contact with eyes, rinse immediately with plenty of water if this occurs
- 7 Do not use this product without allergy test. This test must be carried out 48 hours before you want to use the product
- 8 We recommend not to use henna during the first 3 months of a pregnancy

An allergy test can be performed behind the ear or on the fore arm. Leave for 10 minutes to act. If the treated area shows signs of redness or swelling the use of this product is strongly discouraged.

Note; allergy can both occur on the use of henna as well as the use of the fixator. We therefore suggest performing 2 tests, 1 mix with fixator and 1 mix with water.

IMPORTANT

Keep this product out of the reach of children. The packaging should be kept shut, away from moisture and high temperatures in order to guarantee the quality. Once opened, the product can be used 90 days.

Directives

Glance eyebrow henna is recommended for eyebrows with little color or volume. The natural ingredients also stimulate growth of the hair. The fixation of henna on the skin takes on average of a week after which, depending on the skin type, color begins to fade. This process is speeded up by oily skin or through the use of make-up products in which glycerin or oil is processed.
