

GUIDE TO CHOOSING THE RIGHT SIZE

1. Place your child's foot up against a vertical surface.

The child should be standing straight to ensure correct measurements.

Measure in the afternoon as the feet will become longer and wider throughout the day.

2. Measure the length from the wall to the tip of the longest toe with a ruler.

Always measure both feet as differences in length often occur.

Make your shoe purchase according to the longest foot.

3. Add the recommended wiggle room mentioned under the model you wish to purchase and find your size.

Always follow our size guide under each model, as inner measurements varies between the different models.

Wiggle Room

$$\text{FOOT LENGTH} + \text{WIGGLE ROOM} = \text{SHOE SIZE}$$
